

LEARNING SOLUTIONS

Live Online Training

Interactive Instruction for a Guaranteed Path to Success

Live Online Training's interactive instruction keeps participants engaged and accountable while shortening the study cycle. Candidates are better prepared for their licensing exam and require lower onboarding investment.

Virtual Training Experience

For years our clients have inquired about cost-effective live training options. With the introduction of our Live Online Study Packages, managers and candidates nationwide can now benefit from an affordable and effective learning solution. During virtual sessions, content experts present over a live webcam feed, putting a face to the voice; the platform also allows candidates to speak directly to the instructor over a mic or through chat. Training sessions cover key concepts and difficult topics, allowing candidates to receive immediate answers to their questions. Reinforcement of material is provided throughout the session with unique interactive quizzes. Because of this improved training engagement and accountability, candidates have an increased first time pass rate on their licensing exams.

Offerings and Availability

Insurance offerings are held 3-4 a month, each securities offering is held once monthly, 10AM-5PM CST. Below shows offerings, session length and frequency.

Key Benefits of Live Online Training

- New workbooks let candidates be completely in sync with their instructor and focused on the material being covered.
- Online sessions allow candidates the ability to interact directly with content and exam experts.
- For convenience, a recent virtual session is made available for viewing 24/7 through the online course.
- We've found an increase in overall candidate's first time pass ratios when combined with live training.
- A cost-effective learning solution available for candidates nationwide.
